

## Animals- How Life goes on

### Fill in the blanks: -

1. Chick is formed and grows into a \_\_\_\_\_.
2. The process by which living beings produce more of their young ones is called \_\_\_\_\_.
3. \_\_\_\_\_ is the period of time for which a living being lives or is expected to live.
4. Within the egg shell is egg white called the \_\_\_\_\_.
5. Most birds build \_\_\_\_\_ to lay eggs.
6. \_\_\_\_\_ are most developed amongst all mammals.
7. In certain mammals, father \_\_\_\_\_ and \_\_\_\_\_ the young ones.
8. The chick embryo uses \_\_\_\_\_ as its food and comes out after \_\_\_\_\_ days.
9. Shedding of old skin or shell is called as \_\_\_\_\_.
10. The larva of butterfly is called \_\_\_\_\_ and that of an insect is called \_\_\_\_\_.

### Define the following: -

Reproduction- \_\_\_\_\_

Lifespan- \_\_\_\_\_

Mammals- \_\_\_\_\_

Embryo- \_\_\_\_\_

Albumen- \_\_\_\_\_

Yolk- \_\_\_\_\_

Nymph- \_\_\_\_\_

Moulting- \_\_\_\_\_

Lava- \_\_\_\_\_

Life cycle- \_\_\_\_\_

Reptiles- \_\_\_\_\_

Insects- \_\_\_\_\_
