

Our Climate

The Explorer's Sheet

- Record and compare the temperature of your city with two other cities which are likely to have completely different temperature. Example- Delhi in June with Tamil Nadu and Ladakh in June. Share your observations. Also include the weather news and forecasts.
- Google and find out what it takes to be a weatherman. What is their qualification and where all the weather stations of your city are. Try visiting the weather station nearest to you. You might also want to set up a small weather station in your house with a thermometer and recording its highest and lowest temperature on daily basis.
- Make a list of all the gadgets a weather station needs. Paste the pictures of these instruments.

Unleash the writer in you

If you think you have written/ collected interesting information on the topics above and wish to share with others, send your unique article in word document along with the relevant images (in jpeg format) to contactpracticenlearn@gmail.com. We will be happy to publish it. Do remember to share your name, age, email ID, school name and a picture along with your work.
