

Our Soils

The Explorer's Sheet

- Check the soil of your home/ area and find which type of soil it is.
- Explore what is hydroponics and how it is done. Share your view if hydroponics is the answer or just diverting our focus from the real burning issue of climate change.
- A lot is being done at society, local and national level to conserve soil. But a lot more needs to be done. Share what you think needs to be done to conserve top soil and prevent soil erosion.

Unleash the writer in you

If you think you have written/ collected interesting information on the topics above and wish to share with others, send your unique article in word document along with the relevant images (in jpeg format) to contactpracticenlearn@gmail.com. We will be happy to publish it. Do remember to share your name, age, email ID, school name and a picture along with your work.
