

Plants- Increasing the numbers

Explorer's sheet

During rainy season we see seeds sprouting everywhere. Why?

What makes the soil in the coastal area moist?

Look around your area and make a list of the plants which disperse their seeds through the following agents.

Wind- _____

Water- _____

Animals- _____

Explosion- _____

How do farmers store their crop, fruits and vegetables? Google and make list of various storage methods.

See what you get

- Keep one potato and onion aside for 10 days and see then change in them.
- Make a list of fruits which you eat during summer season and find how you can germinate their seeds.
- Make a list of atleast 20 food items which you eat example sugar, tea, mango, cherry, brinjal, etc and find where do they come from. If processed in factory, then where does the main ingredient grow.

Know who are they and what they did
