

Rocks and Minerals

Explorer's sheet

1. Make a list of precious and semi-precious stones used in making jewels. You can also collect the pictures of the same from Google.
2. Look around your house and spot different metals and their different uses.
3. Google to make a list of the famous monuments or sculptors made from stone.
4. Find out more about the alternative sources of power- wind, solar, hydrogen fuel etc. Search which countries are committing to alternative sources, what are their targets, how will they be generated and what are the pros and cons if any.
5. Do you think switching to alternative sources of energy is really the solution to the problem. Think and write an article on the same.

Unleash the writer in you

If you think you have written/ collected interesting information on the topics above and wish to share with others, send your unique article in word doc along with the relevant images to contactpracticenlearn@gmail.com. We will be happy to publish it. Do remember to share your name, age, email ID, school name and a picture along with your work.
