**Write short answers: -**

Why safety on road is more important than ever?

What are road signs meant for?

How do germs enter the body?

What should we do before giving first aid?

---

---

---

Your friend has been hit by a football on nose. The nose is bleeding. What first aid will you give to your friend?

---

---

---

Why we should never try to prick a blister?

---

---

---

Why when the nose is bleeding, the patient should breathe through mouth and not blow the nose?

---

---

---

Why we should not give liquid to an unconscious person?

---

---

---

---

Why we should not try to douse fire caused by petrol with water? What should we then use in place of water and why?

---

---

---

---

Why we should cover the burning person with a blanket?

---

---

---

---

Why we should not douse the fire, caused by faulty wiring, with water? What should we then use in place of water and why?

**Write true or false and correct the incorrect statement: -**

Germes enter the body through uncovered wounds and cause diphtheria.

---

When the skin is cut by dirty or rusted object, it can cause a dangerous disease called typhoid.

---
