

## E for Environment

Fill in the blanks: -

1. \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_ microorganisms help in decomposing the biodegradable waste.
2. \_\_\_\_\_ are made on the outskirts of the city.
3. \_\_\_\_\_ takes many years to decompose.
4. A \_\_\_\_\_ can take upto 450 years to decompose.
5. \_\_\_\_\_ cause air pollution as toxic waste is burnt.
6. Compost is used as \_\_\_\_\_ by farmers.
7. Kitchen and organic waste can be collected in \_\_\_\_\_ bins.
8. \_\_\_\_\_ saves raw materials and the energy required to produce them.
9. We should buy only what we \_\_\_\_\_.
10. \_\_\_\_\_ breed in stagnant \_\_\_\_\_ and cause diseases.

Define the following with examples wherever possible: -

Biodegradable waste- \_\_\_\_\_

Non-biodegradable waste- \_\_\_\_\_

e-waste- \_\_\_\_\_

Decompose- \_\_\_\_\_

Incinerators- \_\_\_\_\_

Organic food- \_\_\_\_\_

Furnace- \_\_\_\_\_

Manure- \_\_\_\_\_

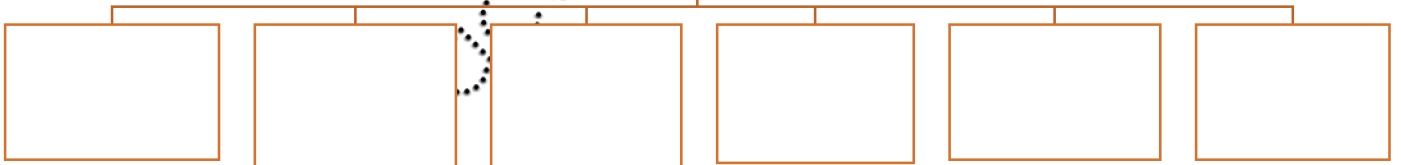

---

Fill the boxes with the types of each: -

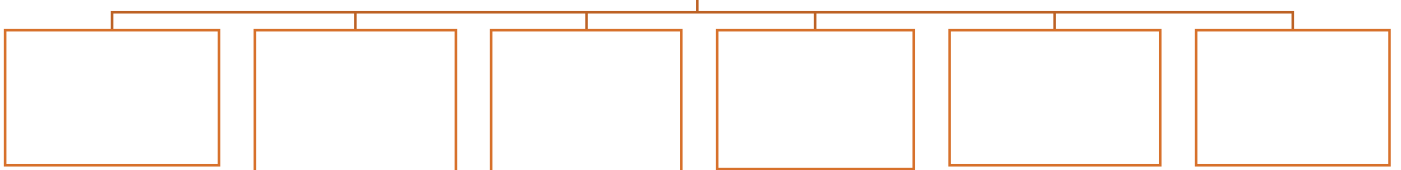

Types of Biodegradable wastes

Types of Non-biodegradable wastes

Types of e-wastes

**Write short answers: -**

How is natural balance of our planet is getting disturbed?

---

---

---

---

What is waste management?

---

---

---

---

Why is organic food good for health?

---

---

---

---

What is composting and why is it the easiest and the safest method of waste disposal?

---

---

---

---

What are the three Rs of the waste management? Explain how we can implement them in our day-to-day life.

---

---

---

---

---
